

Story board for user searching player and viewing report

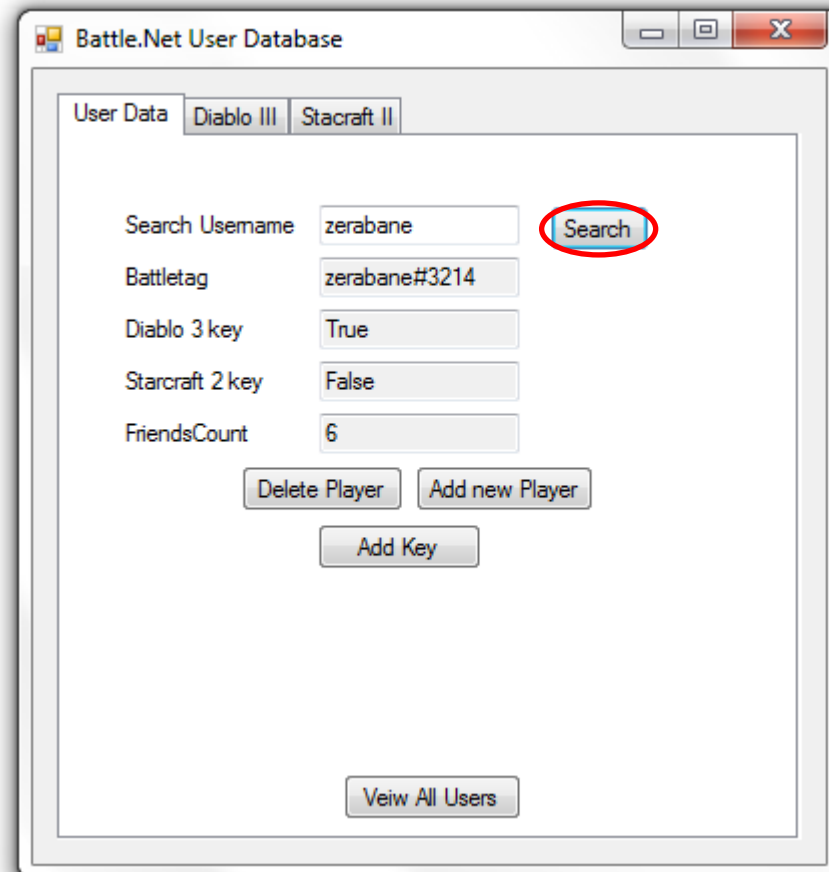

1: On the first user enters a player's name and clicks search

The screenshot shows the 'Battle.Net User Database' application window. It has three tabs: 'User Data', 'Diablo III', and 'Stacraft II'. The 'User Data' tab is active. The form contains the following fields and buttons:

- Search Username:** A text input field containing 'zerabane'.
- Search:** A button next to the 'Search Username' field, circled in red.
- Battletag:** An empty text input field.
- Diablo 3 key:** An empty text input field.
- Starcraft 2 key:** An empty text input field.
- FriendsCount:** An empty text input field.
- Delete Player:** A button.
- Add new Player:** A button.
- Add Key:** A button.
- Veiw All Users:** A button at the bottom.

2: data linked to username is populated and tabs enabled

The screenshot shows the 'Battle.Net User Database' application window after the search. The 'Search' button is still circled in red. The form fields are now populated with data:

- Search Username:** 'zerabane'.
- Battletag:** 'zerabane#3214'.
- Diablo 3 key:** 'True'.
- Starcraft 2 key:** 'False'.
- FriendsCount:** '6'.

The buttons 'Delete Player', 'Add new Player', 'Add Key', and 'Veiw All Users' are still present. The 'Diablo III' and 'Stacraft II' tabs are now enabled and visible.

3: if player owns game key the tab will be enabled and Fields populated
